

65 & 95 Gallon Capacity

# Blow-Molded 3300 Series

3390R

## Convenient Sizes for Efficient Route Service

The 3300 Series Blow Molded Kart, manufactured and marketed by Ameri-Kart, is a high-durability design for universal waste collection systems. The 3300 Series comes in standard 65 and 95 gallon sizes to service a full range of customer needs. Molded of fully recyclable materials, containers are ideal for large volume, contract handling of residential, commercial, and industrial waste.

### **BENEFITS:**

- Universal design elements fit multiple collection systems
- Cost-effective full-truckload shipping

# Options and features to handle mixed customer routes economically

**ANSI compliance: Ameri-Kart's 3300 Series Karts meet all American National Standards Institute (ANSI) Z245.30 and Z245.60 requirements for safety and lifter system compatibility.**

3300 Series Karts are blow-molded of high molecular weight-high density polyethylene (HMW-HDPE) for exceptional durability, vertical strength, and flexibility. A two-step blending process assures complete, even distribution of colorants and UV inhibitors for consistent appearance and performance. Blow molding insures that walls, corners, and features are formed with a high strength to resilience ratio. For more than 40 years, waste haulers and municipal managers have relied on Roll-A-Waste brand products to support profitable, efficient waste collection programs. The 3300 Series Karts are universal in design.

**Hot Stamp Area**

**Lid:** Domed design repels water, allows over packing. **Option:** Double-wall lid available on 3390D

**Hot Stamp Area**

**Ergonomic Handles:** Securely attached to container with plated metal fasteners

**Available Colors:** Black, Dark Green, Moss Green, Earth Gray, Brown, Royal Blue

**Container Body:** UV stabilized HMW-HDPE for color retention and durability, contour panels increase vertical strength

**Metal Latch Bars:** Chromium-plated, attachment with stainless steel fasteners

**Wheels:** HDPE snap-lock style. Axle 3/4" solid plated steel

**Skid Pads:** Molded, replaceable skid bars protect base from abrasion
